

**Field Trip to Caribbean Cement Company  
and Jamaica Gypsum Quarries  
December 2, 2006**

Field Trip Leader: Noel McKenzie

The GSJ had its final field trip for 2006 to the operations of the Caribbean Cement Company and Jamaica Gypsum Quarries. The group visited the gypsum and limestone mines, as well as visited the gypsum shipping port and Rockfort cement processing plant, including the expansion project currently underway. The group was also apprised of the environmental work and exploratory techniques being done at both operations.
